

Stonhard Recommended to Global Pharmaceutical Company for State-of-the-Art Facility

Products Used: Stongard® MR • Stontec® ERF
Stonfil® OP2

Application Area: Packaging Facility and Cleanrooms

“This is the first project that we’ve undertaken with the Stonhard team and we were immediately impressed with their knowledge and experience, which was clear from the solution that they developed in response to our brief.”

~ Senior Construction Manager

PROBLEM

A global pharmaceutical company required a dependable flooring solution to convert an existing warehouse to a state-of-the-art pharmaceutical packaging facility. Concrete slab moisture issues needed to be addressed prior to the flooring installation.

SOLUTION

Stonhard was recommended to the customer by their long-trusted building design company. The project consisted of over 70,000 sq. ft. of durable epoxy systems to be installed throughout the new production facility and cleanroom. The seamless collaboration between the contractor and Stonhard ensured successful completion of the project.

Stonhard addressed moisture issues with an osmotic pressure-resistant grout to eliminate potential blistering in the floor. For the plant rooms and workshop areas, Stongard MR, a waterproof flooring system, was specified to protect underlying spaces. In the newly built cleanroom, Stontec ERF, a high-performance decorative flake epoxy floor was installed, offering a decorative, durable, and stain-resistant solution.

Stonhard’s Contracts Manager, Steve Lyon, said, “With over 100 years in business, the experience Stonhard has gained in pharma and wider

sectors underpinned the design and installation of this flooring project. We’re delighted to see our manufacturing and installation capabilities recognized by such an important supplier to the global pharmaceutical industry.”

DESIGN ELEMENTS

Plant/Workshop: Pewter color; waterproof membrane

Cleanroom: Dakota Bronze color; small flake decorative high-gloss finish

OUR CERTIFICATIONS & MEMBERSHIPS

Stonhard is a member of the U.S. Green Building Council and is on the Manufacturer Advisory Panel for the HPD Collaborative. Stonhard carries an ISO 9001 quality system certification.

THE STONHARD DIFFERENCE

Stonhard is the unprecedented world leader in manufacturing and installing high-performance seamless, resinous floor, wall, and lining systems. With more than a century of experience, Stonhard provides its customers with a single-source warranty covering both products and installation.
