

Global Pharmaceutical Company Selects Stonhard for Production Areas and Clean Rooms

Products Used: Stonblend® GSI

Application Area: Production Areas and Clean Rooms

PROBLEM

A leading global pharmaceutical company required restoration of a plant's production areas and clean rooms. This plant produces more than 400 distinct products with a capacity of two billion pharmaceutical doses. Its epoxy floors had become worn and yellowed, necessitating a solution that offered both performance and aesthetic appeal. Decision makers at the facility desired a terrazzo-like look with minimal joints and a high-quality finish.

SOLUTION

Stonhard, with many decades of experience in providing a variety of floor and wall systems for the pharmaceutical industry, was selected to address the flooring requirements of the plant. The ideal solution was found in Stonhard's Stonblend GSI flooring system, which perfectly combines performance and design. This decorative epoxy flooring system offers a cost-effective alternative to terrazzo, providing exceptional durability, stain resistance, chemical resistance, slip resistance, and a terrazzo-like appearance with a high-quality finish, all while minimizing the number of joints.

DESIGN ELEMENTS

Color: Blue Topaz
Decorative, terrazzo appearance
Smooth finish

OUR CERTIFICATIONS & MEMBERSHIPS

Stonhard is a member of the U.S. Green Building Council and is on the Manufacturer Advisory Panel for the HPD Collaborative. Stonhard carries an ISO 9001 quality system certification.

THE STONHARD DIFFERENCE

Stonhard is the unprecedented world leader in manufacturing and installing high-performance seamless, resinous floor, wall, and lining systems. With more than a century of experience, Stonhard provides its customers with a single-source warranty covering both products and installation.
